

ABDULLAH KHALID

Full Stack Developer | Software Engineer

Pakistan | +92 330 2808835 | abdullahkhalid8835@gmail.com | linkedin.com/in/abdullah-khalid-se

SUMMARY

Full Stack Developer and Software Engineer experienced in building web applications, RESTful APIs, SaaS platforms, ERP/MIS systems, and AI-powered solutions. Strong in PHP/Laravel and Node.js/Express.js with frontend experience in Vue.js, React, and JavaScript. Experienced in database design, authentication, role-based access control, API integrations, AI/OCR workflows, testing, and multi-tenant application development.

SKILLS

Backend: PHP, Laravel, Node.js, Express.js, RESTful APIs, API Development, Authentication, RBAC

Frontend: JavaScript, Vue.js, React, HTML, CSS, Bootstrap, Tailwind CSS, Vite

Databases: MySQL, PostgreSQL, SQLite, SQL, Database Design, Query Optimization

AI & Automation: AI API Integration, OCR, AI-powered Data Extraction, AI Agents, Python, Streamlit

Testing & Tools: API Testing, Manual Testing, Postman, Git, GitHub, Linux, Figma

EXPERIENCE

Full Stack Developer

Feb. 2026 – Present

Techuick

Lahore, Pakistan

- Develop and maintain full-stack applications using Laravel, Vue.js, JavaScript, REST APIs, and MySQL.
- Build authentication, RBAC, API integrations, multi-tenant SaaS, and AI-powered features.
- Optimize databases, debug applications, and resolve production issues.

Software Engineer

Oct. 2025 – Mar. 2026

BRSP (Balochistan Rural Support Program)

Quetta, Pakistan

- Developed Laravel and PostgreSQL applications including MIS, Tender Management, and Task Management systems.
- Built REST APIs, business workflows, reporting, and application features for internal operations.
- Debugged applications and supported database and software issues.

President

Nov. 2022 – Jun. 2026

BUIITEMS Developers' Club (BDC)

Quetta, Pakistan

- Led a 500+ student developer community through technical events, workshops, hackathons, and bootcamps.
- Mentored students in software development, AI, cybersecurity, and emerging technologies.

PROJECTS

AI OCR Document Extractor | *Laravel, Vue.js, MySQL, OCR, AI*

- Built a multi-tenant document processing platform for custom templates and automated OCR to data extraction.
- Integrated AI-based extraction workflows, document processing, role based access control, and tenant level permissions.
- Developed APIs for extracted data, external integrations, and automated business workflows.

TIndex AI Workspace Builder | *Laravel, Vue.js, MySQL, AI*

- Developed a multi tenant AI workspace platform for creating custom data structures and tables without database code.
- Integrated AI schema generation for dynamic table creation, data management, and workspace operations.
- Built backend APIs and frontend workflows for dynamic business data management.

Mitsubishi Import/Export ERP | *Laravel, PostgreSQL, JavaScript*

- Developed enterprise modules for shipment tracking, inventory, customs, suppliers, customers, and business records.
- Centralized import/export workflows and business operations within a unified ERP platform.
- Implemented database-driven workflows, APIs, and frontend integrations for operational processes.

ManageHUB (FYP) | *Node.js, Express.js, MySQL, Electron, SQLite, AI*

- Built a subscription based multi business SaaS platform for inventory, products, employees, customers, and operations.
- Engineered an offline-first Electron architecture using SQLite with synchronization support for business data.
- Integrated an AI agent for natural-language business insights and developed backend APIs using Node.js.

EDUCATION

Bachelor of Science in Software Engineering | BUIITEMS, Quetta, Pakistan | CGPA: 3.6/4.0

2026

CERTIFICATIONS

Google: Cybersecurity Professional Certificate | **Meta:** Front-End Development – JavaScript – Version Control
